

City of Alexandria
Annual Capital Budget
and Five Year Plan
2011-2012

The Government Finance Officers Association of the United States and Canada (GFOA) presented an Award of Distinguished Presentation to the City of Alexandria for its annual Budget for the fiscal year beginning May 1, 2010.

In order to receive this award, a government unit must publish a budget document that meets the program criteria as a policy document, as an operations guide, as a financial plan, and as a communication device.

The award is valid for a period of one year only. We believe our current budget continues to conform to program requirements, and we are submitting it to the GFOA to determine its eligibility for another award.

R. FIVE YEAR PLAN

April 30, 2010

Honorable Mayor and Members of the Alexandria City Council

I am pleased to present the City of Alexandria's Annual Capital Budget and Five Year Plan for the fiscal year 2011/2012 through 2015/2016. Each capital project includes source(s) of funding; prior, current and future expenditures; and scheduling and expenditure breakdowns. The plan, as presented, balances each year's revenue sources with a current or future project's funding requirements.

The City's Charter requires the Mayor to submit to the Alexandria City Council a Capital Improvements Program covering a period of at least five years. The plan is required to be submitted at the same time the annual operation budget for the ensuring fiscal year is submitted. An appropriation approved by the council continues in force until the purpose for which it was created has been accomplished or abandoned. The Charter states that any appropriation shall be deemed abandoned if three years pass without any disbursement from or encumbrance of the appropriation.

A Five Year Capital Improvements Program requires long term planning. It also requires a constant monitoring of current trends in order to make any necessary adjustments to current and future projects proposed in the plan. Technological changes and advancements, community needs and changes in revenue sources are often the reason the City will adjust or reassess the Capital Improvements Program. The Administration and the Council have worked closely to improve the long range planning of the future of Alexandria by focusing on the community's needs and goals. They have worked diligently to establish priorities that will meet the changing needs of our community. This budget document has been designed to aid in the planning process, to provide the citizens with a better understanding of the scope and need for various projects, and to provide direction for the City of Alexandria.

Overview

The 2011-2012 Capital Improvements Program consists of 54 projects totaling over \$18 million. The Administration and Council are continuing their ongoing commitment to improving the City's infrastructure and quality of life for the citizens of Alexandria.

David L. Johnson Asst. Director of Finance P.O. Box 71 · Alexandria, LA 71309-0071 Tel (318) 449-5034 · Fax (318) 449-5231 e-mail: david.johnson@cityofalex.com

General Capital Projects

The following is a breakdown of the General Capital Projects by Category:

| Category | No. of Projects | Total |
|-------------------|--------------------|--------------|
| Public Enterprise | 8 | \$3,751,570 |
| Drainage | 9 | 4,056,000 |
| Streets | 12 | 4,910,000 |
| Police | 0 | -0- |
| Fire | 1 | 350,000 |
| Parks/Recreation | Ĩ. | 75,000 |
| Zoological Parks | 0 | -0- |
| CDBG | 0 | 0- |
| Total | <u>31</u> | \$13,142,570 |

The General Capital Projects are funded by Sales Tax Revenues, Sales Tax Revenue Bond Proceeds, Community Development Block Grant Funds, General Obligation Bond Proceeds, Urban System Funds, State and Federal Funds and Property Tax Revenues. A five year 11.25 mileage property tax dedicated to specific street and drainage projects has been approved by the voters in 1988,1993, 1998, and 2003. This property tax renewed in 2008 for ten years. One-half of the 1976 City Sales and Use tax is dedicated to payment of principal and interest on the sales tax bonds and capital improvements.

Projects involving economic development, construction of new facilities, renovation of existing public facilities and feasibility or master plan studies are budgeted under the Public Enterprise category. The City currently has budgeted 21 projects in this category. The 2011/2012 budget will create 2 new projects and provide additional funding for 6 others.

Work nears substantial completion on the Extension of Versailles Boulevard connecting Jackson Street Extension with Louisiana Highway 28 West. This 3 phase project greatly enhances surface transportation in the growing west side of Alexandria. Work also continues on the Ditch Closure Project. This project involves the replacement of open ditches with below grade drainage pipe, giving a safer and more attractive border to the street while increasing the drainage capacity to prevent flooding. Other major projects under construction include Lincoln Road which is required for the upgrade of Sugarhouse Road; Fire Station Relocation in which the City will relocate 4 of it's 6 fire stations to more strategic locations; and Recreation Park Improvements...

The Reserve for Relocation Projects, which operate as "holding" account for the other projects. Expenditures from these accounts require Council action. The Reserve for Relocation Projects is used to "hold" Utility Funds transferred to the General Capital Projects fund for use with street or drainage projects. The reconstruction of streets or drainage systems often requires the movement or relocation of utility systems. A minimum appropriation of \$100,000 per year is made by the Utility Funds to the General Capital Projects Fund. Budget Amendments will be used to transfer the Utility Fund into special account numbers within a related project. If Utility Funds remain in a completed project, these funds are transferred back to the Reserve for Relocation Projects "holding" account.

Enterprise Capital Projects

The following is a breakdown of the Enterprise Capital Projects by Category:

| | No. of | | |
|-------------------|-----------|-------------|--|
| Category | Projects | Total | |
| Electric | 12 | \$2,435,000 | |
| Water | 6 | 850,000 | |
| Gas | 2 | 1,161,047 | |
| Wastewater | 1 | 750,000 | |
| Other | 2 | 450,000 | |
| Municipal Transit | _0 | 0- | |
| Total | <u>23</u> | \$5,646,047 | |

The Enterprise Capital Projects are funded by revenues generated by the City's Utility System, a Utility Revenue Bond issue, a revolving loan from the State Department of Health and Hospitals, and matching FTA grants.

At present, the City is engaging consultants to assess the needs of it's Utilities System infrastructure. This will assure the ability of the 4 components; electricity, gas, water and wastewater, to provide reliable service to the customer at the existing level of service as well as provide for any anticipated growth in all areas. This assessment will materially impact future capital budgets in the Enterprise Capital Projects.

Sincerely,

David Johnson

Acting Director of Finance

City of Alexandria

CITY OF ALEXANDRIA FIVE YEAR CAPITAL IMPROVEMENT PROGRAM GLOSSARY OF TERMS

REVENUE TERMS:

Community Development Block Grant (CDBG) - Revenue received from the Community Development Block Grant source via the City's Community Development department.

Federal Grants - Revenue received from the U.S. Government, or as a Federal pass-through grant from the State of Louisiana.

Property Taxes - Revenue from the 11.25 milage 1993 Streets and Drainage Tax.

Sales Tax (STX) - Revenue from the City's Capital Outlay Fund supported by the ½ cent sales tax.

Sales Tax Bonds (STXB) - Revenue from sales tax bonds.

Special Assessments (ASMT) - Revenue received from the legal process of assessing benefitted property owners or physical improvements such as sewer lines or street improvements.

State Grants - Funds received from the State of Louisiana, excluding pass-through grants.

Utility Revenue Bonds (RB) - Revenue from the sales of Utility Bonds.

Expenditure Terms:

Construction - Contracted cost associated with the actual implementation or construction of an improvement. This should include material costs associated with projects utilizing city crews for implementation.

Demolition Cost - Contract cost associated with demolition or site preparation.

Engineering/Architectural Design - Any cost related to the design phase of the project either by the city or private firm.

Inspection Fees - Cost of providing for project inspection usually performed either by the city or private firm.

Land Acquisition - Any cost associated with the acquisition of property of implement the project.

Landscaping - Costs associated with miscellaneous grading and landscaping activities incidental to the construction activity. Landscaping for parks should be shown in the construction classification.

Major Equipment - Costs associated with movable or immovable equipment, generally costing over \$5,0000 and having a useful life of five years.

CITY OF ALEXANDRIA FIVE YEAR CAPITAL IMPROVEMENT PROGRAM GLOSSARY OF TERMS

continued

Miscellaneous Definitions:

Activity - A service performed by a department or division.

Appropriations - Authorization granted by the City Council to make expenditures for a given period and the proposed means of financing them.

Assessments - An amount levied on personal property on a cost sharing basis for improvements made by the city for the benefit of a small group of property owners (e.g. Special Assessments for the reconstruction of a sever line in lightly populated area).

Budget Carryover - The total of the current budget, April 30, minus prior year(s) expenditures.

Capital Budget - The City's five year financial plan that contains both the estimated revenues to be received and the proposed Capital expenditures to be incurred to achieve a stated objective.

Department - A section of a Division.

Division - A functional unit of the City containing on or more departments or activities.

Fund - A fiscal and accounting entity with a self-balancing set of accounts recording cash and other financial resources, together with all related liabilities and residual equities or balances, and changes therein, which are segregated for the purpose of carrying on a specific activities or attaining certain objectives in accordance with special regulation, restrictions, or limitations.

Fund Balance - Resources remaining from prior years which are available to be budgeted in the current year.

Fund Source - The source of Revenue used to pay for a particular project.

Ordinance - A formal legislative enactment by the governing body of a municipality.

Project - A large or major undertaking designed to achieve an objective.

Project Category - The functional improvement category under which a project is assigned. (e.g., Public Enterprise, Economic Development, Streets, etc.).

Urban Systems - Federal funded street projects that match local funds for the reconstruction of major streets.

PROJECT SPECIFICATIONS

PROJECT DESCRIPTION:

This project is being created in order to facilitate the coordination of appropriations necessary for the relocation of Utilities due to Street and Drainage projects. The Utility Fund will allocate funds to be used for utility relocations associated with Street and Drainage Projects proposed in the 1988 and 1993 Property Taxes. An amendment will be required to transfer the appropriation to the appropriate project.

PROJECT JUSTIFICATION:

The establishment of this flow through project allows for better coordination between the Utility Fund and the General Fund on projects associated with the Property Tax projects.

PROJECT SPECIFICATIONS

PROJECT DESCRIPTION:

- 1. To provide for a covered drive through unloading animals and adequate quarantine areas
- 2. To provide a building for both the old and the new cremators
- 3. To provide for a new cremator and emergency generator.

PROJECT JUSTIFICATION:

An enclosed builing is needed to perform the task of disposing of euthanized or discarded animals, both for the City and surrounding areas. Currenty, animals are unloaded in the weather and in full view of the public. Disposal of animals is unpleasant but necessary, and comes with many criticisms and public relation concerns. The new building will provide seclusion and weather protenction while loading and unloading impounded animals, some of whom are vicious and pose a threat during the process. The additional cremator will allow extra volume and be a backup to the existing unit in case of failure. Additional kennels will meet American Humane standards.

PROJECT SPECIFICATIONS

PROJECT DESCRIPTION:

As our many structures are aging, this project provides for a planned approach to replacement and enhancements of city properties. By including many sub-projects in this single project, this allows for adjustments in priorities of work pending conditions "on the ground" in the current fiscal year. By planning ahead on funding, the Council can anticipate inevitable expenditures while allowing the Building Maintenance operation the flexibility to apply the funds at the most expedient place.

PROJECT JUSTIFICATION:

Currently tasks in this project include HVAC Renovation at City Hall, Paint Shop addition, Foundation Repair./ door work at City Compound, Replacement of HVAC Split systems at City Compound and other projects.

| Extend the Fueling Depot Canopy to cover all pumps. |
| Retrofit/replace obsolete Petrovend POS systems. |
| |
| |
| |
| |
| |
| |
| PROJECT JUSTIFICATION: |
| The City is required to operate the City Complex under a LDEQ stormwater discharging permit. The permit specifically regulates the |
| discharge from fueling operations and places numerical limits on pollutants that can be discharged such as oil and grease. Initial testing |
| showed the Fuel Depot to be out of compliance. A cover must be constructed over the fueling area to minimize the discharge of petroleum |
| products to the storm drain system. |

ID Prox Card access systems for gates & turnstiles

CCTV System Improvements

New vehicle gate operators and renovations

PROJECT JUSTIFICATION:

The City Compound houses most of the critical operations of the Public Works Division and some operations of the Utilities Division. There is a considerable investment in equipment and supplies that needs further securing. Existing CCTV system is outdated, inadequate, and is down for repair frequently. Existing gate operators are 15 years old, and should be upgraded with the proposed 24/7 automatic operation. The Card Access System will integrate with the city wide keyless security system to provide tighter control and reporting of access.

PROJECT SPECIFICATIONS

PROJECT DESCRIPTION:

Work Management Software will provide cost accounting for labor and materials, preventive work planning and roll up costing on an enterprise basis. The roll out will be in three phases starting with the Water and Building Services Departments. The second and third years will bring on other departments.

PROJECT JUSTIFICATION:

Work Orders—scheduling jobs, assigning personnel, reserving materials, and recording costs. Preventive Maintenance—keeping track of preventive maintenance inspections and jobs, including step-by-step instructions or checklists, lists of materials required, and other pertinent details. Asset Management—recording data about equipment and property including specifications, warranty information, service contracts, spare parts, purchase date, and expected lifetime. Inventory Control-management of spare parts, tools, and other materials including the reservation of materials. Advanced Reporting and Analytics—creating customized reports and analyses that can be used to forecast likely problems in time.

PROJECT DESCRIPTION:

TOTAL COST

As this valued and essential asset is aging, this project provides for a planned approach to replacement and enhancements of the Riverfront property. By including many sub-projects in this single project, this allows for adjustments in priorities of work pending condition. This will be a consolidation of some existing projects and addition of some new projects.

PROJECT JUSTIFICATION:

Currently, tasks in this project include HVAC Control System upgrade (70K), sealing of exterior masonry(15K), modernization of temporary wiring for conventions(35k), conditioning of equipment storage room to prevent rusting of equipment and furniture (15K), furniture and fixture replacement (85K), upgrade of building lighting system(110K), and other projects.

PROJECT SPECIFICATIONS

PROJECT DESCRIPTION:

The Recreation Maintenance Operation Building will be a simple building to match others at the City Compound. The building will consist of a small engine maintenance area, a secure facility for small engine and other equipment, an inventory area, his and hers restrooms, three offices for supervisors and a general office area. This facility will be about 3400 square feet.

PROJECT JUSTIFICATION:

This will accommodate their move of operations to the City Compound and will accommodate a closer integration with management.

PROJECT SPECIFICATIONS

PROJECT DESCRIPTION:

Installation of 15", 18", 24" and 30" RCP, catch basins, 24 feet wide 6" thick concrete street with curb and gutters, relocation of utilities and all additional street and drainage appurtenances required to complete this Project.

Street and drainage improvements are to be provided on Jefferson Street from Lee Street to Joseph Street, on Joseph Street from Jefferson Street to Carlton Street and on Carlton Street from Joseph Street to Green Street.

PROJECT JUSTIFICATION:

The existing drainage facility is inadequate to accommodate the storm flow in this neighborhood. Street and drainage improvements are proposed to reduce flooding.

PROJECT PRIORITY:

A

START DATE:

June 2005

PROJECT SPECIFICATIONS

PROJECT DESCRIPTION:

Installation of 15", 18", 24' and 30" RCP, catch basins, replacement of street and driveway pavement and all additional drainage appurtenances required to construct this project.

PROJECT JUSTIFICATION:

There is inadequate drainage facilities along Ellis and Paul Street to collect storm water without flooding the street. The proposed drainage improvements will reduce flooding in this area.

| PROJECT DESCRIPTION: |
| Certification of Red River Levee in cooperation with the Red River, Atchafalaya, and Bayou Bouef Levee and Drainage District(RRABB). |
| PROJECT JUSTIFICATION: Due to flood hazard remapping efforts by the Federal Emergency Management Agency (FEMA), the Red River Levee was not certified by the US Army Corps of Engineers and accredited by FEMA because of issues with sand boils in close proximity to the levee. As this de-acceditation would have a significant negative economic impact within the City and Parish, the City will enter into a cooperative endeavor |
| agreement with RRABB to secure certification and accreditation. |

PROJECT SPECIFICATIONS

PROJECT DESCRIPTION:

Replace existing 66" Corrugated Metal Pipe with double 9' by 9' Reinforced Concrete Box at railroad spur track at Durawood Plant within Hynson Bayou.

PROJECT JUSTIFICATION:

Alleviation of obstruction at this location and improvement of flow (hydraulic grade line) of Hynson Bayou, one of the City's major drainage outfalls.

PROJECT SPECIFICATIONS

PROJECT DESCRIPTION:

Construct two traffic lanes measuring 12' wide with 10' and 8' shoulders along with necessary street and drainage appurtenances from the relocation of New York Ave. (La. 1208-1) along Sugarhouse Road towards Bayou Hynson approximately 1100 linear feet past Lincoln Road.

PROJECT JUSTIFICATION:

Drainage improvements are needed to accommodate the required drainage for the relocation of New York Ave. (La. 1208-1) since our existing drainage facilities will be unable to handle the increased design flow from La 1208-1 to Bayou Hynson. The Master Street Plan indicates a proposed street improvement connecting MacArthur Drive To La. Highway 1. By implementing the Master Street Plan we will not only construct a proposed street improvement but also construct drainage improvements which are shown on the Master Drainage Plan.

PROJECT SPECIFICATIONS

PROJECT DESCRIPTION:

Construction of a 8" thick pavement section for Versailles Boulevard from Coliseum Boulevard towards the Diversion Canal, 40 feet wide; subsurface drainage; catch basins; sidewalks and all additional street and drainage appurtenances required to complete this project.

PROJECT JUSTIFICATION:

It is necessary to construct another road that will move traffic away from the construction area of the proposed five laning of Jackson Street. Completion of the extension of Versailles Boulevard will allow subdivisions located between Jackson Street and the Diversion Canal to use this road to Coliseum Boulevard thence to the business district. Partial funding is obtainable through the Urban Systems Program.

PROJECT SPECIFICATIONS

PROJECT DESCRIPTION:

Installation of 8" concrete pavement with curb, reinforce concrete pipe, catch basins, traffic control devices and all required street and drainage appurtenances.

PROJECT JUSTIFICATION:

The volume of traffic along Lodi Road has increased due to present Subdivision development. Additional property in this area is now being considered for development, some of which as commercial with the remainder as residential. The anticipated traffic volume to be generated by the proposed developments will require the widening of Lodi Road from a two lane road to at least a four lane improvement.

Project is shown on the Master Street Plan.

PROJECT SPECIFICATIONS

PROJECT DESCRIPTION:

Construction of a 30 feet minimum 8" thick concrete pavement; concrete sidewalks; sub surface drainage; intersection improvements at Grove Lane and Horseshoe Drive and widening Horseshoe at MacArthur from a two lane to a three lane pavement section.

PROJECT JUSTIFICATION:

Horseshoe Drive handles a large volume of traffic that flows from Masonic Drive, Martin Park and several subdivisions along Horseshoe to MacArthur Drive. This project will improve the flow of traffic and correct a bad intersection at Horseshoe and Grove Lane.

PROJECT SPECIFICATIONS PROJECT DESCRIPTION: Construct five foot wide sidewalk along Enterprise Road. PROJECT JUSTIFICATION: Enterprise Road has road side has limited shoulders and deep ditches. When children are dropped off from school at Highway 1 at Enterprise Road, the children have to walk on the street since there is little room for them to walk on the road shoulder. Sidewalks will be constructed behind the existing ditch which will provide safety for the children as they walk home from the school bus stop. PROJECT PRIORITY: A Two Months START DATE: **EST TIME TO COMPLETE:** August 2005 **OPERATING BUDGET EFFECT:** NONE N/A SEE DETAIL

PROJECT SPECIFICATIONS

PROJECT DESCRIPTION:

Develop a new streetscape along Masonic Drive that will attract and encourage businesses to redevelop the area and begin to establish a new identity for the corridor. Access to and improvement of City assets along the corridor such as the Alexandria Zoological Park, Bringhurst Golf Course, and other facilities in Alexandria City Park fronting both sides of Masonic Drive will be incorporated into the design. The streets and sidewalks will be designed to accommodate biking and pedestrians along with cars in a safe manner.

PROJECT JUSTIFICATION:

This will enhance public infrastructure to stimulate private sector development, establishing a new identity for the corridor.

PROJECT DESCRIPTION:

Develop a new streetscape along Bolton Avenue that will attract and encourage businesses to redevelop the area and begin to establish a new identity for the corridor. Elements of the area's historic background will be reincorporated into the design. Parks and open green space will be incorporated along with pedestrian access.

PROJECT JUSTIFICATION:

This will enhance public infrastructure to stimulate private sector development, establishing a new identity for the corridor.

PROJECT SPECIFICATIONS

PROJECT DESCRIPTION: Reconstruction of Green Oak Avenue with Portland Cement Concrete Pavement and subsurface drainage improvements.

PROJECT JUSTIFICATION:

Future Funding
TOTAL COST

Existing roadway consists of asphaltic concrete roadway with open ditches. Existing roadway surface and base is deteriorating due to lack of shoulder support from open ditches. Existing surface drainage passes to 4th, 5th, 6th, and 7th Streets to be collected a block away from Green Oak and results in considerable street flooding during periods of moderate rainfall. This project will reconstruct the roadway to match existing adjacent streets with like surface and provide increased drainage to eliminate roadway flooding.

PROJECT SPECIFICATIONS

PROJECT DESCRIPTION:

To acquire land for park and green space for the City of Alexandria. This is a multi-year project that is seeking to secure a large acreage tract.

To improve and develop parks and green space within the City of Alexandria. This is a multi-year project that is seeking to enhance the aesthetic quality and recreational function of existing and future City owned parks and green space.

To improve existing park structures, including new roofs, renovations, and additional park equipment.

PROJECT JUSTIFICATION:

Park and green space in Alexandria is being overwhelmed by usage. There is not adequate space to accommodate citizen usage. Additional land is necessary.

The City has begun an aggressive land acquisition program to accommodate the increased citizen usage of parks and green space. Additional funds are necessary to develop tracks as they are acquired by the City.

PROJECT SPECIFICATIONS

PROJECT DESCRIPTION:

An area roughly 100' X 100' with bronze animal sculptures, a water area that contains a large granite globe suspended in water. Other features include shooting fountains of water for children to play in and an area surrounded by benches. The fountain will hold no less than 2" of water and will be constructed of safe, non-slip materials.

PROJECT JUSTIFICATION:

This will provide additional recreational opportunities in the community; a place to cool off in the summer. Will include an attractive entrance display. It is low maintenance.

PROJECT SPECIFICATIONS

PROJECT DESCRIPTION:

Replace undersized, old conductors on existing 12.5 KV circuits that have become too small to carry the load required and to replace existing 2.5 KV line with 7.2 KV Distribution.

2006-2007 Budget includes preparation for Recycling Services.

PROJECT JUSTIFICATION:

Continued expansion of the system, along with load growth has made many old circuits inadequate. Voltage regulation, burned connections and customer complaints require upgrades on a continuing schedule as workload and funds allow.

PROJECT SPECIFICATIONS

PROJECT DESCRIPTION:

Build parallel 138 KV tie from Twin Bridges Substation to Prescott Road Substation, with two 12.5 KV underbuild lines for developments adjacent to the route proposed. Also includes a fiber optic shield wire from Prescott Substation to Bayou Rapides Substation to insure adequate control of breakers, relaying, and control of system. Radio communications sometimes get impeded by other entities with frequencies too close to the SCADA frequencies.

PROJECT JUSTIFICATION:

To allow proper circuit switching, improve system reliability, and permit greater flexibility for CLECO to wheel through our transmission system. The current configuration does not allow adequate redundancy in the event of a failure of the line or equipment tied to it. The added underbuild provide greater switching capabilities in the event of a failure of one or more substations.

PROJECT SPECIFICATIONS

PROJECT DESCRIPTION:

Replace approximately 84 transmission poles in the 138 KV Loop. Original poles were installed in the 1960's and had an anticipated life of 30 years. Most of the engineering has been done "in house".

PROJECT JUSTIFICATION:

The 138 KV Loop provides power to all the substations in the system. If 2 sections of the loop are lost simultaneously, many customers would be without power until the 90' and 100' poles could be replaced, which would take too long with existing City crews and equipment.

PROJECT SPECIFICATIONS

PROJECT DESCRIPTION:

Replace leaking, rusted out roof panels and siding on Electric Distribution Warehouse and Office. Replace with standing seam roof to match Power Plant and City Complex buildings. Also replace leaking windows with solid glass and replace front door with weather proof door.

PROJECT JUSTIFICATION:

Existing roof has numerous leaks, due to rust from cooling tower chemicals, wind damage, and age. Interior tiles have water damage.

PROJECT SPECIFICATIONS

PROJECT DESCRIPTION:

Install oil containment around oil filled equipment (transformers, OCB) in substation to prevent spills from failed equipment.

PROJECT JUSTIFICATION:

EPA & DEQ regulations require containment provision around oil filled electrical equipment to prevent contamination of waterways that are subject to run-off from leaks and spills. Affected substations are D.G. Hunter, Willow Glen, Sterkx Road and Prescott Road.

PROJECT SPECIFICATIONS

PROJECT DESCRIPTION:

Replace OCB's with GCB's. Build Distribution Station on adjacent land within Power Plant yard. Convert existing substation to switch yard for transmission.

PROJECT JUSTIFICATION:

Existing substation was built in 1964. The equipment and cables are past useful life. All bulk energy moved through the 138KV system goes through this substation. The stability and reliability of the entire transmission system is compromised as this older equipment fails. Three other capital projects related to the DG Hunter Substation can be combined or eliminated by this project.

PROJECT SPECIFICATIONS

PROJECT DESCRIPTION:

New 138/12470 Substation needed to relieve Prescott Substation and Twin Bridges Substation. New station would have dual 28MVA transformers and 8 potential circuits. Station could start with 1 transformer and be upgraded later as loads demand.

PROJECT JUSTIFICATION:

Neither Prescott, Twin Bridges, nor Sterkx Road Substations can provide back up power during peak loading and planned maintenance. Neither substation can safely carry the combined load of both during emergencies. Southwest Power Pool 2011 Model justifies an additional substation to prevent possible blackout caused by CLECO 138 KV failure.

PROJECT DESCRIPTION: Replace 36" Valve at Shell Road.

PROJECT JUSTIFICATION:

Valve is needed to control the water flow to the Rosalino Storage Tank. Control was previously done from the Valve at the International Paper Plant. Due to the plant's closure, a control valve is needed on Shell Road.

PROJECT DESCRIPTION:

Replacement and reconstruction of Martin Park Subdivision, Zone 21 gas distribution system for the area from Horseshoe Drive to Spencer Street and from Manor Drive to Mansour Avenue. This project will include a gas regulator station, 2" through 4" mains and new service lines and assemblies.

PROJECT JUSTIFICATION:

The existing gas lines in this area are antiquated and leak prone causing a very hazardous situation. This work will upgrade the area's gas system and reduce the probability of hazardous gas problems.

PROJECT SPECIFICATIONS

PROJECT DESCRIPTION:

Upgrade existing telephone network to be self reliant. Will allow phone communications between all city facilities to continue without interruption in service from Bell South is lost.

PROJECT JUSTIFICATION:

Eliminate dependence on Bell South and problems with old phone lines that Bell South refuses to replace. Creates redundancy where a single point of failure will not effect telephone network. All sites will be capable of running on their own without being connected to City Hall. No limitations on voice calls between facilities. All facilities would have features that the central switch has. All future upgrades can be done at once instead of at each different facility. Upgrades can be done without shutting down the entire telephone network.
